Play different. Think brass.
Handcrafted drums - Made in Austria. - drums.schagerl.com

“My family has a 400-year-long tradition of metalworking. Where else would have been better for the drum workshop than here? It was definitely the right decision.”

Markus Lechner | Head of Drums

Handcrafted Brass. Made in Austria.

Play different. Think brass. It often needs just an initial spark followed by patience and elbow grease.

The development of an exceptional drum needs extraordinary know-how as well as a passion for the work.

You can find this all at Musikhaus Schagerl: a nationally and internationally known master craftsman's workshop in the field of instrument making. Here you'll find staff who will go the extra mile to guarantee the delivery of distinctive, top-quality instruments.

Naturally, it doesn't come as a surprise that we build unique drum sets. Yet it is amazing that drums have found their place among the trombones, trumpets, and flugelhorns which can be found in this old blacksmith's shop.

At Musikhaus Schagerl the ideas and prototypes for our drums are born and produced. These drums have created a worldwide sensation and naturally follow the path of success which had already been paved by the brass instruments produced in our workshop.

MODEL

ANTARES

Antares is the brightest star in the constellation scorpius and is the fifth-brightest observable star in the night sky. Named for its equal footing to the Greek God Ares, it is easy to see why we chose „Antares" as the name for the line of brass snare drums. Each drum makes a bold statement with heavy yellow brass tube lugs and a raw finished 0.7mm brass shell.

Adorned with 2.3mm yellow brass or black nickel over steel hoops, the Antares evokes images of battle-worn Grecian armor while retaining a subtle elegance.

The multi-step Trick Drums strainer allows for precise tension adjustments making the Antares suitable for conventional kit playing as well as orchestral work. The shell itself is dramatically undersized at the top and the bottom to create a tympani effect with remarkable resonance. The raw finished brass will retain its gorgeous looks due a lacquer covering. No two Schagerl Drums raw finish drums are alike.

MODEL PERSEPHONE

Persephone is every bit worthy of its Greek namesake. The dramatically undersized top and bottom edges create a cask shape which acts like a tympani drum, creating the purest of overtones, while remaining easily controllable. No two raw, raw lacquer or dark vintage drums are alike. The strainer is a Trick Drums Multistep strainer for precise snare control and the single point solid brass lugs allow the shell to resonate freely.

The acoustically neutral nature of the copper shell makes it an ideal studio drum.

PHILHARMONIC

The Philharmonic Series is a selection of Snare Drums fine-tuned to the requirements of orchestras and classical percussionists worldwide.

The drums are available in 14", three different depths and in the materials brass or copper.

The modified multi-step Trick Drums strainer allows for precise tension adjustments making the Philharmonic Drum suitable for orchestral work. The Schagerl Drums 5-piece shell itself is dramatically undersized at the top and the bottom to create a tympani effect with remarkable resonance. The raw finished or patinated brass and copper shells will retain its gorgeous looks. No two Schagerl drums are alike.

Each Schagerl Philharmonic Snare Drum ships with a velvet bag for storage and polishing.

SCHAGERL®
DRUMS

„Supergenaue Ansprache im pianissimo, flexibel im Charakter, präzise Trennung der einzelnen Anschläge und trotzdem sehr angenehm zu spielen.
Von der Optik über die Verarbeitung bis zum Klang, ein rundum gelungenes und tolles Instrument“

Precise responsiveness in pianissimo, flexibility, and exact definition of individual beats – yet still fun to play!
From the design to the craftsmanship to the tone, this drum is a well-rounded and successful instrument.
